

MODULAR WASTE WATER TREATMENT SOLUTIONS

FOOD & BEVERAGE INDUSTRY

WHAT'S THE CHALLENGES?

- Wastewater complexity
- Volume & concentration fluctuation
- Stringent discharge regulations
- Corporate demand & compliance for carbon footprint reduction

ACHIEVE COST EFFECTIVENESS WITH VEOLIA'S TECHNOLOGIES

-  Enable the reuse of water in industrial processes
-  Minimise waste processing costs
-  Shorten the set-up time for treatment plant
-  Reduce carbon footprint & environment impact

VEOLIA MODULAR WASTEWATER TREATMENT PLANT

- **Exclusive process & proven know-how** backed by solid references
- **Smart integration of process** meeting customer needs
- Excellent value and quality: **robust, trusted & proven technologies**
- **Veolia's added value services** such as Hydrex Chemical Solutions and AQUAVISTA™ Digital Services

MBBR (Moving Bed Biofilm Reactor)

Leading **aerobic treatment**, using aerobic bacteria which are growing around moving carriers.

- Robust
- High tolerance in handling peak load
- Flexible as carrier can be added in the future to increase the treatment capacity

DAF IDRAFLOT (Dissolved Air Flotation)

Chemical-physical separation process

Coagulation, flocculation and clarification steps using a mix of air and water used as a separation agent to allow the sludge to float up.

- Low footprint
- Great performance with high TSS
- Avoid the issue of wild denitrification

HYDROTECH DISCFILTER

Self-cleaning mechanical filtration system

Disc filter offers a large filtering area in a small footprint for effluent polishing or water reuse.

- Modular design
- Easy maintenance
- Avoid noise & odour
- Low energy consumption
- Continuous filtration even during backwash

MODULAR WASTEWATER TREATMENT PLANT

COMPACT TECHNOLOGIES

Compact bundling solutions for space constrained area:

- DAF + MBBR + DAF
- MBBR + Disc Filter

Modular wastewater treatment plant offers high capacity treatment in small footprint for F&B effluent.

EXCELLENT QUALITY & VALUE

- In-depth pre-engineered solution
- Pre-selected equipment
- Established brands
- Earlier start of construction works
- Shorter execution time at site

TIME & COST EFFECTIVENESS

DAF

- Plug & Play Modules (delivered assembled & tested)
- Save time & cost as no concrete (slab only)

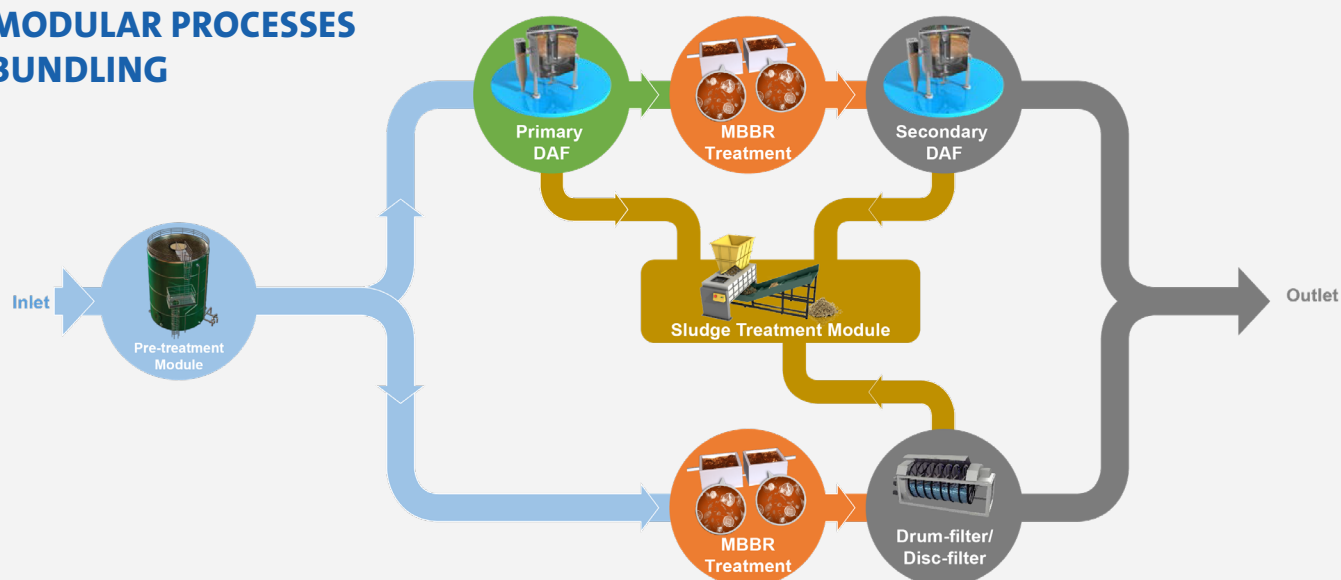

MBBR

- Cost & time saving on concrete work using MBBR panel tank
- Ready to be assembled

Ready to use

- Execution deliverables readily available

MODULAR PROCESSES BUNDLING

VEOLIA'S SERVICE ADVANTAGES

MAINTENANCE SERVICES CONTRACT

CORRECTIVE AND PREVENTIVE MAINTENANCE

LAB MANAGEMENT

STAFF TRAINING

ASSET MANAGEMENT

HYDREX™ CHEMICALS

CONTROL OF TSS

REDUCTION IN SLUDGE VOLUMES

ANTIFOAMS

INORGANIC COAGULANTS

AQUAVISTA™

REAL TIME REMOTE MONITORING

DOCUMENT MANAGEMENT

QUICK GLANCE DASHBOARD

DYNAMIC ALARM MANAGEMENT

SPARE PARTS & CONSUMABLES

BLOWERS

PUMPS

FILTER PANEL
