The FILTRAFLO PACK Mono/Duo/Trio pressure filters reduce turbidity from water for a wide range of industrial and municipal applications.

Flow rates: 10 - 100 m³/h per unit

Features & Benefits
- Mono, double or triple layer filters
- Compact, skid-mounted unit can be easily integrated into water treatment system
- Modular; compatible with other standard Veolia units
- Plug & play system, rapid installation and commissioning
- Fully-automated system; easy to use
- Flexibility; several options available
- Compliant with ACS, CODAP, 97/23/CE DIRECTIVE/NFEN ISO 12944 standards

Applications
- Drinking water treatment
- Cooling water
- Pre-filtration for RO systems
- Filtration of surface water
- Wastewater treatment
- Re-use and recycling

Related Services
- Support for installation and commissioning
- Local after-sales service for preventative and corrective maintenance program
- Tailor-made design according to project

Efficient Filtration process

- Lined steel filter, certified French ACS or stainless steel lining
- 304L Stainless steel manifold
- Electrical or pneumatic valves
- Differential pressure control
- Operating pressure from 0 to 16 bars
- Equipment size and weight depending each design size
- Several levels of automation available
- Backwash skid with pump and air blower
- Turbidity control
- Disinfection system
- Pipe work in 316 L stainless steel

Options

- Pneumatic valves with air compressor instead of electric valves
- Remote process control; PLC
- Inlet flow regulation valve

For higher flow rates or other processes, consult your local Veolia Water Technologies representative.
